

AUSTRALASIAN GROUNDWATER CONFERENCE

NATIONAL CENTRE FOR
GROUNDWATER
RESEARCH AND TRAINING

GROUNDWATER FUTURES SCIENCE TO PRACTICE
11-13TH JULY 2017 UNSW, SYDNEY

Panellist: The Australasian Groundwater Stocktake

Mr. Stewart Cameron

Senior Scientist; Head of Department: Hydrogeology – GNS Science

Stewart Cameron is a hydrogeologist with research interests in hydraulics of porous media, river-groundwater interaction, groundwater resource evaluation and denitrification. His special areas of interest include 1) modelling approaches for delineation of groundwater well capture zones, 2) application of hydrogeological principles for groundwater quantity resource evaluation, and 3) quantifying the hydraulic and nitrate removal performance of saturated porous carbon media, including effect of temperature.

Stewart runs the GNS-led Smart Aquifer Characterisation programme and the groundwater-surface water interaction objective of this programme.
