

SA Basins

Stratigraphy & Hydrogeology

This the first of a series of workshops examining the stratigraphy and hydrogeology of the major sedimentary basins in SA. The Murray Basin is the first on the list. The workshop includes:

- Examination of core samples of the major sedimentary units
- Presentations on the geological history, structure and processes
- Viewing 3D visualisations of the surfaces of the major sedimentary units
- Discussion of the hydrogeology of the three major aquifers
- A data package of key geological and hydrogeological reports and GIS coverages of sedimentary surfaces and hydrogeology (salinity and potentiometric surfaces)

WHEN

Friday, March 2nd at 9.30 am to 3.00 pm

WHERE

South Australia Drill Core Reference Library
5 Tonsley Boulevard, Tonsley, SA
(map page 2)

COST

Workshop only (course notes, morning tea, lunch) \$ 50

Workshop and data pack (reports, GIS data) \$ 200

Delegates can choose the workshop only option and/or workshop plus data package
